

**National Cancer Institute  
Board of Scientific Advisors**

***Ad Hoc Childhood Cancer Data Initiative Steering Committee***

The NCI Board of Scientific Advisors will convene a Steering Committee to provide oversight of the development and implementation of the Childhood Cancer Data Initiative (CCDI), to establish more efficient ways to share and use childhood cancer data, identify novel therapeutic targets and approaches, new drug development, as well as new research pursuits to better understand the biology of childhood cancers. In addition, the Steering Committee will consider how to best advance the themes proposed for the Initiative and may recommend other research activities to enhance this effort.

Steering Committee membership will include select NCI advisory board/committee members, as well as individuals with expertise in pediatrics, bioinformatics, technology, clinical informatics, translational research, therapeutics, drug development, and other domains.

The Steering Committee will advise the NCI Board of Scientific Advisors and the NCI Director.
