

**National Cancer Institute
Board of Scientific Advisors**

Ad Hoc Working Group on Prevention

Given the changing nature and opportunities related to cancer prevention, screening, and early detection, the NCI Board of Scientific Advisors (BSA) will convene a Working Group to consider how best to utilize the significant, albeit limited, resources and personnel of NCI in developing and sustaining a cancer prevention and early detection research program.

Working Group membership will include select BSA and NCAB members, as well as individuals with expertise in prevention, early detection, risk assessment, data science, technology, clinical informatics, consumer health, basic research, translational research, and other domains.

The Working Group will advise the NCI Board of Scientific Advisors and the NCI Director.
