get behind a cure.

Getting there from here

- Scientifically-driven trials that are ...
- Highly feasible in a system that is ...
- Strategic and ...
- Rigorously evaluated and ...
- Transparent when possible with ...
- Real-time feedback

get behind a cure.

Focus of NCTN

- **Quality of life and survivorship**
- **Different modalities**
 - **Surgery**
 - **Radiation**
 - **Imaging**
- **Treatment trials that industry won't or can't do**
 - **Combination trials**
 - **Deep science**

get behind a cure.

Unintended Consequences

- **Committees of the many**
- **Possible areas of consolidation and more collaboration**

get behind a cure.

Advocates across the system

**Highly engaged
and impactful**

**Uncertain
about our role**

**Collective training, clear expectations,
understanding on all sides of our role**

get behind a cure.
